Andy Johnson, Department of Information Technology, presented. Dale Miller asked for follow up on the final total of capital costs; and asked the department to be prepared to present at the next project update to the Council Committee. Nan Baker asked if this expense is considered operating and does it impact the cost of the Enterprise Resource Planning Project; asked how much of the recommended amount is anticipated to be spent; asked if this amount includes unanticipated costs through the end of December; and asked is it more realistic that the requested amount will cover through July, 2022 and should the department be requesting that end date, as they could come back later if more money is needed. James Boyle asked for follow up on what the prior year surplus in the allocated budget was and has any of the surplus been expended. Michael Chambers said that changing the end date to July, 2022 would require starting the process over, whereas, the department could always submit an amendment at a later date if more funds were required. Nan Baker asked if the original contract amount of \$40,000.00 just covered the initial locations or was it a continuation of an existing program; asked for additional information on the locations covered under this amendment; said the amended amount seems high as this is just a modification to the program while the original cost to implement the program was \$40,000.00; asked if the department anticipates another funding investment from the County; and asked if bikes are still available to be rented. Michael Chambers and Mike Zapola, Fiscal Department, presented. Dale Miller asked why this amendment is almost twice the amount of the previous contract; asked if the vendor is paid a set amount or is it based on an hourly rate; and said it is good that the vendor is available to address Finance and Budget Committee, as needed, at no additional cost. James Boyle asked how this vendor was selected in the past; said he is concerned that these services have not been bid; said that continuing to use the same provider, even if vendor has familiarity with County business and has performed satisfactorily, precludes other vendors the opportunity to do business with the County. Paul Porter explained that the original contract was procured through the RFP exemption process but there may have been a competitive process in the past; said this item was flagged to be competitively bid at the end of this contract period. Michael Chambers motioned to approve the item; James Boyle seconded. Item BC2022-284 was approved by unanimous vote.

Funding Source: General Fund

Phillip Lilly, Sheriff's Department, presented. Nan Baker asked for clarification on how many uniforms will be purchased; asked if uniforms are purchased only after individual hiring is complete; and asked what accessories are included in the uniform purchase. James Boyle asked how long this vendor has been used for this service. Paul Porter explained the process for outreach to vendors who opted to not bid on an advertised service; said that only 1 vendor responded to the no bid sheets on this bid who indicated they were unable to provide this specific service; and said that many times vendors will not follow up with Department of Purchasing as to the reason they chose to not bid. Project Status and Planning

The project is a new to the County.

Funding

The project is funded by FAA Federal Project Grant monies.

The schedule of payments is by invoice

The project is an amendment to a contract. This amendment changes:

The items encountered were due to unforeseen circumstances which were required to be mitigated to carry out the design intent of the plans.

This is the 3rd Amendment of the contract.

Change Order 7: During proof roll efforts of the subgrade in phase 4A of the base bid significant rutting was encountered with some ruts being 12"-18" deep. The significant rutting and the texture of the subgrade material indicated that the material is unsuitable. The contractor was directed to undercut the area to remove all unsuitable material where rutting was occurring. The area removed was backfilled with P-154 followed by the proposed pavement section. The additional work to remove the unsuitable material has been deemed appropriate and acceptable and will be paid under the unclassified material and P-154 items. This change order covers all costs associated with the effort (time, materials, overhead, etc.) to complete the necessary work.

Change Order 8: This change order covers the cost for time, materials, overhead, and all other expenses associated with the work to remove and reinstall the security fence next to Eaton's fuel farm. The fence was poured into the existing concrete that was to be removed per plan. The fence had to be disassembled and then reassembled into the proposed concrete.

Change Order 9: When removing the existing concrete pavement section from the west side of phase 4A it was discovered that the remaining concrete where the new pavement section ties into had a keyway joint. The plan called for that joint to be an expansion joint with expansion board, however there was concern that the void left between the expansion board and the keyway would cause cracking issues due to moisture and lack of support. After discussions on how to address this issue, it was determined it would be best to cut 5-6 inches back from the edge of concrete to remove the keyway and reconstruct that additional area per the full designed pavement structural section. The cost associated with this change order accounts for the work, materials, overhead, etc. required to perform the additional work.

Change Order 10: The contractor was removing existing concrete and unclassified materials from the phase 4A area and came across a concrete encased duct bank. The duct bank was determined to have a live telecommunication line in it and was to be protected in place. The elevations of the top of the concrete encased duct bank were shot with a rover and compared to the proposed concrete elevations. It was determined that the duct bank was 2-6" into the proposed concrete pavement. An RFI was submitted to the RPR and then forwarded and approved by the engineer. A rebar mat was placed across the concrete duct bank 10 feet on either side of it. The additional work to install a rebar mat has been deemed appropriate and acceptable and will be paid under this change order. This change order covers all costs associated with the effort (time, materials, overhead, etc.) to complete the necessary work.

Change Order 11: During excavation of unclassified material in phase 4B the contractor found some abandon underdrain pipe that ran across the jobsite. The pipe was rotted and collapsed and was removed. During excavation of unclassified materials in the phase 4B area existing underdrain running east to west was discovered. A portion of the existing pipe was in the pavement structural section and right in line the proposed underdrain to be installed. The existing pipe was graded to drain to the west, so as the pipe went further to the west it eventually fell out of the pavement section. The section of existing pipe that was in the proposed pavement section was removed. The proposed underdrain pipe coming out of CB1 was tied into the existing underdrain that remained in place.

The additional work to remove the underdrain pipes and install new underdrain has been deemed appropriate and acceptable and will be paid under the pipe removal and underdrain items. This change order covers all costs associated with the effort (time, materials, overhead, etc.) to complete the necessary work.

Change Order 12: During removal of unsuitable material an undisclosed underdrain pipe was discovered at the bottom of the excavated area. In order to continue to provide adequate drainage to the underdrain it was backfilled with 57 stone. The additional work to backfill the underdrain pipe has been deemed appropriate and acceptable and will be paid under the pipe removal and underdrain items. This change order covers all costs associated with the effort (time, materials, overhead, etc.) to complete the necessary work.

The extra work did not delay the project completion.

The extra work completed in COR 7, 8, 9, 10, 11 and 12 were necessary to meet design intentions and keep the project moving without delays. The work and methods involved with each COR were deemed acceptable and appropriate.

This was a formal bid that was released by DoP on 11/17/21 and had an original close date of 12/20/21 but had to be extended one week to close on 12/27/21 to accommodate further site walk-throughs for the bid process.

Bids were analyzed in January and award letters sent in early February. Required documents were requested from the vendor on 2/14/22. There were delays in obtaining the award documents from the vendor, causing the lengthiest delay in the award process. Note, the contract 2308 had ERP/Infor technical issues causing glitches in the award process and the contract award had to be cloned in the system to CM 2432. There was an additional delay in April regarding the award amount, since the estimate and not-to-exceed amount stated in the bid was \$240K but after DoP and the Law Department analyzed the award, there were multiple discussions on how much we can award since the bids came in around \$117K.
