VIII. Overview of Final Jail Program

- Single Level Scheme 50 - 60 acres

- Key Attributes

- + Single level housing.
- + All housing can have windows, either directly to the exterior with internal chases or via borrowed light if a rear chase is employed.
- + Outdoor recreation areas for all units can be partially open to the sky.
- + Potential for incremental expansion.
- Significantly large site required which may not be available in proximity to City of Cleveland.
- Long Travel distances (See Table p. A-6), Total corridor length Phase 1, 5,764 ft, with expansion 7,627ft: Excessive travel impacts movement of food, laundry, population and most importantly emergency response time.
- Similarly, excessive travel distance for Attorney visiting to cluster.
- Potentially increase construction costs – circulation, utility distribution, building enclosure, electronic security.
- Increased building maintenance & operations costs – utilities, building enclosure, site maintenance

Ground Floor

VIII. Overview of Final Jail Program

- Two Level Compact Scheme 25-30 acres

- Key Attributes

- + Reduced site requirements.
- + Planned with rear chase to allow exterior expression to reduce the institutional appearance as a jail; A portion of the housing can have views and access to natural light borrowed across the chase; balance will have access to views and natural light from the recreation yards and via skylights for the upper level.
- + Outdoor recreation areas for all units can be partially open to the sky.
- + Significantly reduced travel distances, (44% reduction vs. Alternative 1) relative to movement of food, laundry, population and most importantly emergency response time (See Table p. A-6),.
- + Similarly, reduced travel distance (See Table p. A-6),for Attorney visiting to cluster (68% reduction).
- + Reduction in foundations, building enclosure, utility distribution, and circulation.
- + Potential reduction in construction cost for Central Plant & Maintenance
- + Reduction in building maintenance & utility costs.
- + Increase in “built-in” expansion from modification of single/double cell mix in some units.
- No incremental expansion – large single project required
- Some potential cost impact of rear chase configuration mandated if urban site
- 50 % of cells have borrowed light only
- Two level scheme
