

AT-A-GLANCE: BUILD A KIT – CAR

Emergency Kit for the Car

In case you are stranded, keep an emergency supply kit in your car with these automobile extras:

- Jumper cables
- Flares or reflective triangle
- Ice Scraper
- Car cell phone charger
- Blanket
- Map
- Cat litter or sand (for better tire traction)

Prepare Your Car for Emergencies

Have a mechanic check the following on your car before an emergency:

- Antifreeze levels
- Battery and ignition system
- Brakes
- Exhaust system
- Fuel and air filters
- Heater and defroster
- Lights and flashing hazard lights
- Oil
- Thermostat
- Windshield wiper equipment and washer fluid level

Car Safety Tips

- Keep your gas tank full in case of evacuation or power outages. A full tank will also keep the fuel line from freezing.
- Install good winter tires and make sure they have enough tread, or any chains or studs required in your local area.
- Do not drive through flooded areas. Six inches of water can cause a vehicle to lose control or possible stall. A foot of water will float many cars.
- Be aware of areas where floodwaters have receded. Roads may have weakened and could collapse under the weight of a car.
- If a power line falls on your car you are at risk of electrical shock. Stay inside until a trained person removes the wire.
- If it becomes hard to control the car, pull over, stop the car and set the parking brake.
- If the emergency could affect the stability of the roadway avoid overpasses, bridges, power lines, signs and other hazards.
